Art Unit: 1714

The amendment filed on June 9, 2004 canceling all claims drawn to the elected invention and presenting only claims drawn to a non-elected invention is non-responsive (MPEP § 821.03). The remaining claims are not readable on the elected invention because the instant claims would have been restricted if applicant had presented them earlier.

Invention II (new claims 29-38) does not utilize the technical specific features of invention I (examined and cancelled claims 1-28) because the instantly recited silicone oxide powders of Invention II (broad) do not require silicone oxide powders of Inventions II (specific, since it recites hydroxyl groups), and because the instant fluorine-containing elastomer encompasses non-inventive fluoro silicone rubber (see original claim 1).

As pointed out in the office action by examiner, the intended use of claims 27 and 28 had no probative value and the examined claims 1-28 are directed to a composition and molded articles thereof, and thus the instantly recited semiconductor production apparatus had not been examined. Also, the semiconductor production apparatus belongs to other technology groups or art units.

Since the above-mentioned amendment appears to be a *bona fide* attempt to reply, applicant is given a TIME PERIOD of ONE (1) MONTH or THIRTY (30) DAYS, whichever is longer, from the mailing date of this notice within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD UNDER 37 CFR 1.136(a) ARE AVAILABLE.
